Trade Negotiation

Outlook of CMITC

Based on the current service business, CMITC is to develop online trading platform of bulk commodity and online trading center of spot metal.

CMITC will create a cross-border trading platform, where different transaction modes are applicable, including mail transaction mode, spot transaction mode and bidding mode.

CMITC will implement the online business into the traditional bulk commodity trading by introducing financing institution to develop order financing, warehouse financing and draft acceptance financing, and introducing third-party logistics, warehousing and distribution.
